

Hystax Live Cloud Migration to Azure

Fully-automated migration process

Migration from Physical Machines and any cloud platform

Unlimited number of test migrations

Fully-managed migration process and orchestrated launch

Hystax transforms the way enterprises approach cloud migration, cutting project timelines from months to days. Hystax Live Cloud Migration to Azure enables small business and enterprise to modernize IT infrastructure by switching the environment to high performance Microsoft Azure cloud. The solution is application and Operating System agnostic, agentless, fast, secure and meets cloud migration needs of any business and industry.

Supported source platforms: Amazon Web Services, Google Cloud Platform, Microsoft Azure, Oracle Cloud, Alibaba Cloud, VMware, Hyper-V, OpenStack, physical machines.

Application agnostic: SAP, Microsoft Active Directory, PostgreSQL, Oracle, NGINX, RedHat Jboss Enterprise, IBM WebSphere, Apache, VMware vSphere, MySQL, MongoDB, Hadoop, Spark etc.

Operating System agnostic: Windows, RHEL, CentOS, Debian, Ubuntu.

Business Benefits

- Full automation of migration process with respect to business application structure and topology
- Live migration from any source platform – VMware, Hyper-V, OpenStack, Microsoft Azure, Amazon Web Services, Oracle, KVM, Bare Metal
- Testing and configuration of a migrated site before making it primary
- External and internal background replication without any data loss and orchestrated launch on a target site
- Final migration / cutover within a small maintenance window
- Low total costs of migration

Features

- Isolated solution running only on the customer environment
- Live background data replication to a target site
- Agentless migration without any data loss
- Pre-created and customizable migration plans with support of orchestration and business application topology
- Full coverage with RESTful API
- Sophisticated partner and customer dashboard for end-to-end migration management
- Migration within a small maintenance window
- Test migrations - an automated way to launch business applications on a target site without stopping production or loss of data
